

FREEDOM TOWER

2012 - 2013
NEW YORK CITY, NY

FREEDOM TOWER / ONE WORLD TRADE CENTER

The One World Trade Center, also known as the Freedom Tower, is symbolic of America's strength, resilience, and unity. With a total height of 1,792 ft. to the tip, the One World Trade Center stands as one of the tallest buildings in the world.

In 2012, IKG® supplied approximately 19,000 sq. ft. of serrated bar grating for walkways, access ports, equipment rooms, antennae landings, and the antennae platform. The communications platform, the large circular structure at the base of the antennae, consists of three different layers structured with IKG® bar grating, the top layer reaching an elevation of 1,712'7".

Approximately 133 tons of IKG® bar grating was produced, totaling upwards of 500 hours in engineering, project management, and manufacturing.
