

SABINE PASS LNG

2012
CAMERON, LA

CHENIERE SABINE PASS LNG TERMINAL

The Cheniere Sabine Pass LNG Terminal located in Cameron, LA, covers over 1,000 acres of land and is the world's first import/export facility.

IKG® manufactured bar grating for Trains 1 & 2 in 2012. 120 truck loads were estimated to have been used to deliver 460,000 sq. ft. of standard bar grating and 14,000 sq. ft. of heavy-duty and miscellaneous bar grating. IKG® bar grating was manufactured for access ways, stair treads, instrumentation and process levels, totaling to 1,866 tons and approximately 12,400 hours of engineering, project management, and manufacturing to complete this job.

Trains 1 and 2 were completed by the Fall of 2016 with approximately half a million square feet of IKG® bar grating.
